FOR THE ECO LOVER...

SOFTECH Thinks of the environment and invested in a recycling process to reduce waste generated when producing fabric and bags. on request of the customers we can offer bags made with 100% recycled material. The bags keep the same look and strength as the ones made with 100% virgin material.

ECO-bags serve as a solution to the planned obsolescence of disposable grocery bags. The production of any tangible good will lead to some waste, but the magnitude of waste is ultimately determined by how the resources are utilized. The life of reusable eco-bags doesn't just end at the market, the actual effectiveness of these bags is assessed by how often the consumers use them.

NON-WOVEN NURSERY BAG

Features : **Non-woven nursery bags offer an innovative solution for planting. After just one month of light exposure, the planting sleeves activate their photodegradation process, allowing them to be planted directly into the soil. This maximizes water retention inside the bag, promoting better plant growth. As the non-woven material degrades, it enriches the soil, allowing plants to reproduce freely and contributing to an ecological and sustainable lifecycle.**
